Data Protection & Child Safety Statement

World STEM Cup Education Foundation is committed to protecting the privacy, safety, and well-being of all students who participate in its programs and competitions.

Student Data Protection

We collect only the minimum data necessary to operate educational programs and competitions. Student data is:

- Used solely for educational and operational purposes
- Stored securely with access controls and audit logs
- Never sold or shared with third parties for commercial purposes

The Foundation operates in compliance with applicable data protection regulations, including COPPA (United States) and GDPR principles where applicable.

Child Safety

Student safety is a core priority. To protect minors:

- All online competition environments are monitored and logged
- Academic interactions follow clear codes of conduct
- Access to sensitive systems is restricted to authorized personnel
- Safeguards are in place to prevent misconduct, abuse, or exploitation

A designated Data Protection & Child Safety Officer oversees compliance, risk assessment, and incident response.

Digital Integrity

Competitions are conducted through secure digital systems designed to:

- Prevent unauthorized access
- Detect irregular activity
- Maintain auditability and fairness

Reporting & Accountability

Concerns related to data protection or child safety may be reported confidentially. The Foundation investigates all reports promptly and takes appropriate corrective action.

This commitment ensures a safe, respectful, and trustworthy environment for students, educators, and partners worldwide.
